SENIOR FULL STACK DEVELOPER

2015 - 2023

FREELANCE

Various long term missions as a contractor. Always worked remotely with Ruby on Rails and Vue.js using agile methodologies.

My latest client was Effilab (worked with them for a year). I was part of the internal tools team, we were all senior devs.

Here's a non-comprehensive list of topics I worked on in the past:

- Payments (via Stripe, Braintree, Paddle, Mollie, SegPay, Shift4).
- Authentication via Facebook, Google, Microsoft.
- Authentication via JWT.
- PDF generation (Prawn).
- Performance optimisation (server configuration, cache, CDN).
- Query optimisation.
- CI/CD setup via CircleCI.
- Administration interfaces (ActiveAdmin, Avo).
- A complete booking system.
- A complete invoicing system.
- Sync with spreadsheets (Google Sheets, Airtable).
- Scrapers.
- Data presentation on a map (Google Maps API, OpenLayers).
- Data visualisation via charts (Chart.js, Highcharts).
- AJAX file upload (to the servers, to CloudFlare).
- Automation of ad campaigns (Facebook Marketing API, Google Ads API).
- Worked with Kubernetes, Docker, Google Cloud.

SOLOPRENEUR / INDIE MAKER

2016 - 2022

Built from scratch various products, learning new technologies along the way.

Teachee.io, TestYourEnglishPronunciation.com, MingleMaps.com, DevsOnRails.com (discontinued), ZenBooking.io (discontinued), Video Bookmark Manager.
